

SEVERE WEATHER BULLETIN #19
FOR: SEVERE TROPICAL STORM "SIONY" (ATSANI)
TROPICAL CYCLONE: WARNING

ISSUED AT 8:00 AM, 06 November 2020

(Valid for broadcast until the next bulletin to be issued at 11 AM today)

THE CENTER OF SEVERE TROPICAL STORM "SIONY" HAS CROSSED MISANGA ISLAND IN ITBAYAT, BATANES.

Track and intensity outlook:

- **Track:** The center of "SIONY" crossed the island of Misanga in Itbayat, Batanes at around 7:50 AM today. On the forecast track, this storm will continue moving westward to west-northwestward and pass over the sea off the southern coast of Taiwan within 12 hours. "SIONY" is forecast to exit the Philippine Area of Responsibility (PAR) tonight. Afterwards, it will turn southwestward tomorrow morning over the sea to the southwest of Taiwan and move over the West Philippine Sea towards the Paracel Islands area.
- **Intensity:** "SIONY" is forecast to either maintain its current strength or slightly intensify to 100 km/h within the next 24 hours. Beyond this 24-hour window, the storm is forecast to significantly weaken due to increasingly unfavorable conditions associated with a surge of the northeasterlies over the West Philippine Sea. It may be downgraded to a Low Pressure Area on Monday.

Hazards affecting land areas:

- **Strong winds:** Areas under Tropical Cyclone Wind Signal #2 are currently experiencing damaging gale- to storm-force winds, while those under TCWS #1 are currently experiencing strong breeze to near gale conditions.
- **Heavy rains:** Today, the passage of "SIONY" will bring moderate to heavy rains over areas under TCWS #2 and light to moderate with at times heavy rains over areas under TCWS #1. Flooding (including flashfloods) and rain-induced landslides may occur during heavy or prolonged rainfall especially in areas identified in geohazard maps as highly or very highly susceptible to these hazards. PAGASA Regional Services Divisions may issue local thunderstorm/rainfall advisories and heavy rainfall warnings while the Hydrometeorology Division and River Basin Flood Forecasting and Warning Centers may issue General Flood Advisories and Basin Flood Bulletins as appropriate.
- **Storm surge:** In the next 24 hours, there remains a minimal to moderate risk of storm surge of up to 2.0 m over the coastal areas of Batanes and Babuyan Islands.

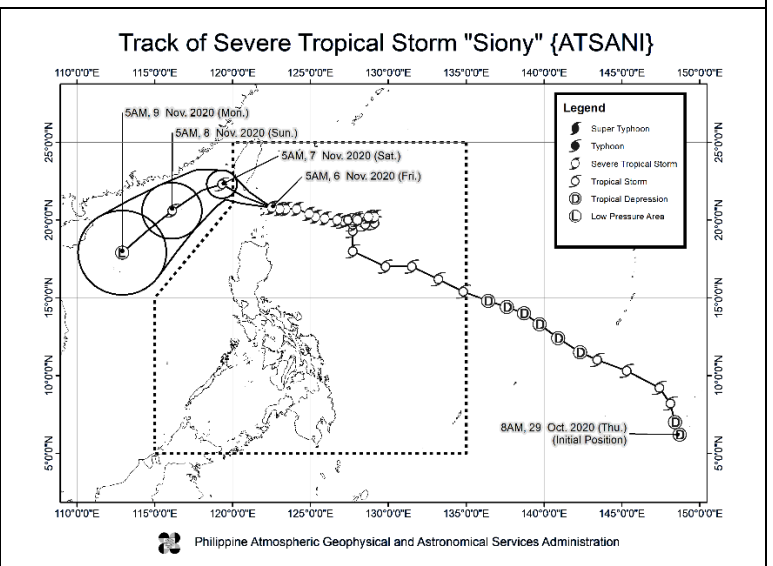

Hazards affecting coastal waters:

- In the next 24 hours, **rough to high seas (3.0 to 8.0 m)** will prevail over the coastal waters of areas where TCWS #2 and #1 are in effect while areas under gale warning will be experiencing rough to very rough seas (3.0 to 4.5 m). The complete list of seaboard where gale warning in effect is detailed in Gale Warning #47 issued at 5:00 AM today. **Sea travel is risky over these waters for all types of seacrafts in areas under TCWS and for small seacrafts in areas under gale warning.**
- **Moderate to rough seas (1.5 to 3.0 m)** will be experienced over the western seaboard of Central Luzon and the eastern seaboard of Southern Luzon, Visayas and Mindanao. **Mariners of small seacrafts are advised to take precautionary measures when venturing out to sea. Inexperienced mariners should avoid navigating in these conditions.**

Other tropical systems being monitored (as of 7:00 AM today)

- The Low Pressure Area outside the PAR was estimated at **1,200 km East of Mindanao (9.5°N,137.2°E)**. It is forecast to move generally west-northwestward or northwestward and may enter the PAR this afternoon or evening. It is heading towards the direction of Eastern Visayas and may likely reach the area tomorrow afternoon or evening. This weather disturbance may develop into Tropical Depression "TONYO" within the next 48 hours.

Location of eye/center	At 7:00 AM today, the center of Severe Tropical Storm "SIONY" was estimated based on all available data at 25 km East of Itbayat, Batanes (20.8°N, 122.1°E) .
Strength	Maximum sustained winds of 95 km/h near the center and gustiness of up to 115 km/h .
Movement	Moving Westward at 20 km/h .
Forecast Positions	<ul style="list-style-type: none"> • 24 Hour (Tomorrow morning): 310 km West Northwest of Itbayat, Batanes (OUTSIDE PAR) (22.3°N, 119.3°E) • 48 Hour (Sunday morning): 610 km West of Basco, Batanes (OUTSIDE PAR) (20.6°N, 116.1°E) • 72 Hour (Monday morning): 795 km West of Sinait, Ilocos Sur (OUTSIDE PAR) (17.9°N, 112.9°E)
